Varishthajana Swasthya Sewa Abhiyan

MOBILE HEALTHCARE PROGRAMME FOR THE AGED IN 20 LOCATIONS ACROSS INDIA

Analysis & Findings of Baseline Survey Conducted for implementation of Mobile Health Care Programme for the Aged in Operational Area of Hazira MMU under ONGC Asset, Hazira

Project Implemented by

HelpAge India | Fighting isolation,
poverty, neglect

Study conducted by

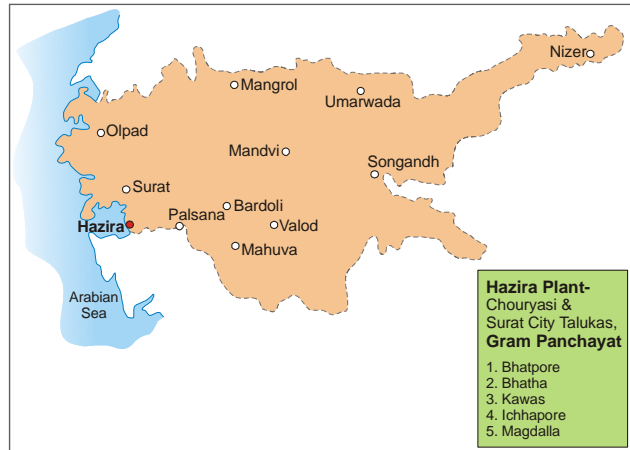

Four x 4
Empowering People

Analysis & Findings of Baseline Survey Conducted for implementation of Mobile Health Care Programme for the Aged

Unit: Hazira (MMU MIS Location Code: 1317)

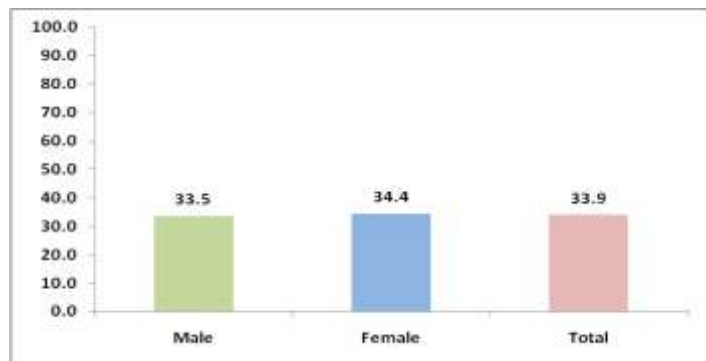

Background

Hazira is on the outskirts of Surat, Gujarat. It's ONGC's largest plant and the plant was established by acquiring land from nearby villages. Therefore, some of these villages were identified as per the suggestion of concerned ONGC officials. Accordingly the survey was conducted to identify all households with elderly persons (aged 55 years and above) in the selected villages. Details are available in Table 1.1.

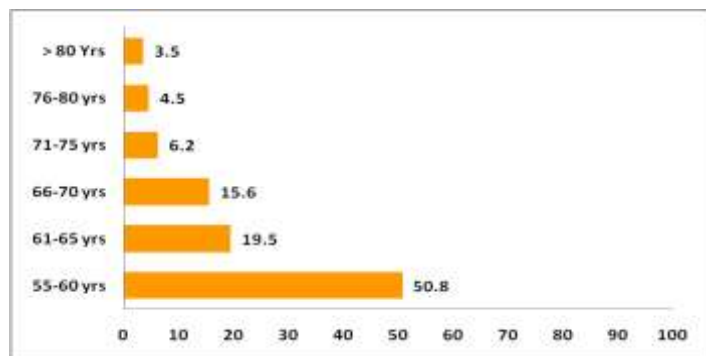

Demography

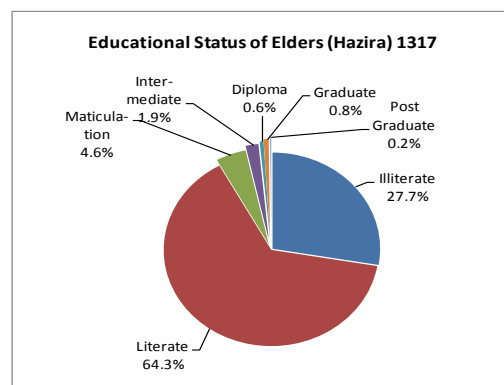

Of all the 1124 households, more than 22% are Below Poverty Line (BPL) whereas the rest (more than 77.5%) belong to the Above Poverty Line (APL) category. Out of the total members of all the surveyed households, elders constitute almost 34%. Male elders are 33.5% and female elders are almost 34.5%. Details are available in Table 2.1.

When one looks at the percentages of elders in different age groups, the 'above 80 years' category is at the bottom and the percentage increases with each successive younger age group among elders. The percentage of the youngest age group among elders is the highest among all. Details are available in Table 2.2 to Table 2.3.

Data on educational status on elders reveal that more than 27.5% are illiterate and out of the rest more than 64% are just literate. Matriculates are marginally more than 4.5% while intermediate are at almost 2%. All other categories are at less than 1% levels. Details are available in Table 3.1 to Table 3.8.

Out of all elders more than 72% are not working. Among non-working elders percentages of women elders across

all age groups are far more than men elders. At the other end, across all age groups of elders the percentages of working elder men are far above working elder women. Working women were not found in 76-80 and more than 80 age categories. More details are in Table 4.1 to 4.2.

Disability

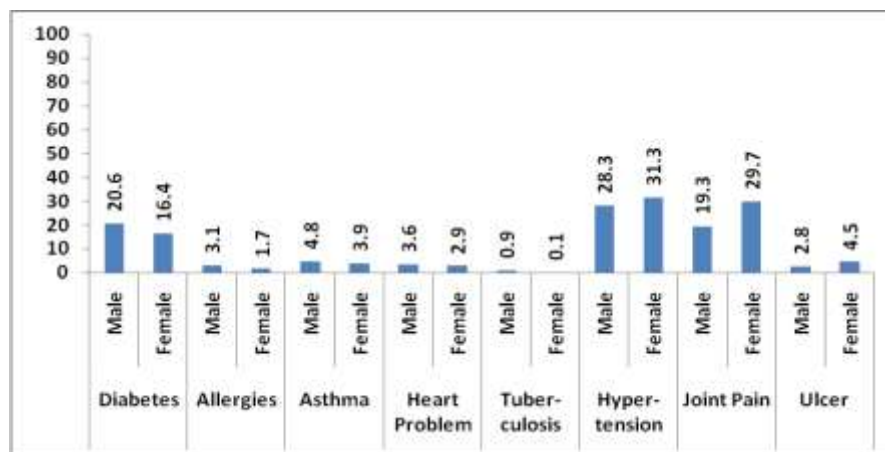

Out of all surveyed elders, marginally more than 1.5% are reported to be disabled. Leg related disability was reported among elders at more than 0.7% level. All other categories have reported at less than 0.3% level. Speaking disability was not noticed at all. Details are available in Table 5.1 to Table 5.7.

Habits in Elders

More than 55% of all elders do not have any habits of intoxication which is revealed by collected data. Out of all elders who have reported one habit or the other, highest percentage (almost 14.5%) are consuming locally brewed liquor, followed by more than 11.5% using tobacco, more than 8.5% smoking beedi, almost 6% consume gutkha, more than 3% smoke cigarettes, and less than 1.5% consume foreign liquor. None was found using opium. Details are available in Table 6.1 to Table 6.7.

Disease Profile of Elders

Among the elders of the identified villages, joint pain has affected the highest percentage- more than 29.5% females and more than 19% males. More than 31% females and more than 28% males have reported to be suffering from Hypertension. Diabetes has affected more than 20.5% males and almost 16.5% females. Asthma is at a relatively much lesser level, i.e. almost 5% males and almost 4% females have acknowledged to be suffering from this disease. More than 3.5% males and almost 3% females are suffering from heart diseases. Tuberculosis is reported at less than 1% level for males and females suffering from this illness are at an insignificant level. Ulcer is found among almost 3% males and 4.5% females. Allergies have affected more than 3% men and more than 1.5% women. Among all diseases, in case of three of them (hypertension, joint pain and ulcer) percentages of affected women are more than men. For details please see Table 7.1 to Table 7.8.

Further details on all the aspects related to elders are available in the tables presented below.
