MOBILE HEALTHCARE PROGRAMME FOR THE AGED IN 20 LOCATIONS ACROSS INDIA

Analysis & Findings of Baseline Survey Conducted for implementation of Mobile Health Care Programme for the Aged in Operational Area of RDS Area MMU under ONGC Assam Asset RDS Area

Project Implemented by

Study conducted by

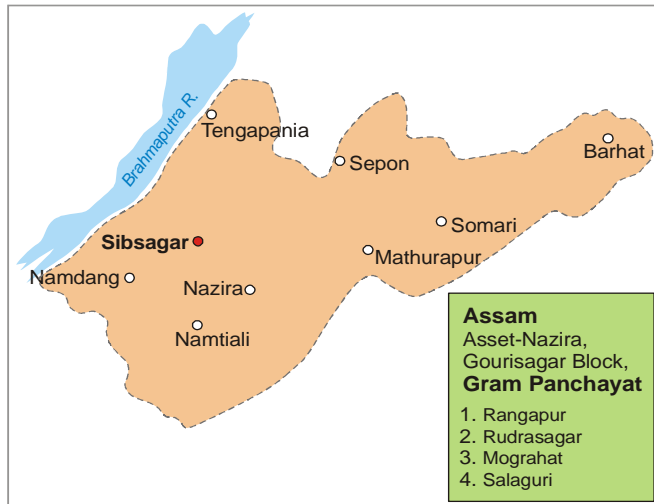

Analysis & Findings of Baseline Survey Conducted for implementation of Mobile Health Care Programme for the Aged

Unit: RDS Area (MMU MIS Location Code: 1310)

Background

ONGC’s Assam Asset is located in Nazira in Sibsagar District. Its operational areas are spread over vast areas of the District. One of these areas is Rudrasagar (RDS) under Gaurisagar block. Under this unit the villages for proposed MMU operations were identified in consultation with ONGC senior officials. Survey was accordingly organized to locate all households with elders.

Demography

Out of the total 3043 surveyed households, 55.7% belonged to the Below Poverty Line (BPL) category and 44.3% belonged to the Above Poverty Line (APL) category. Out of the total members found in the surveyed households, total percentage of almost 36.5% were elders. Elder males (37.8%) are more than elder females (34.8%). For details please see Table No. 1.1 and 2.1.

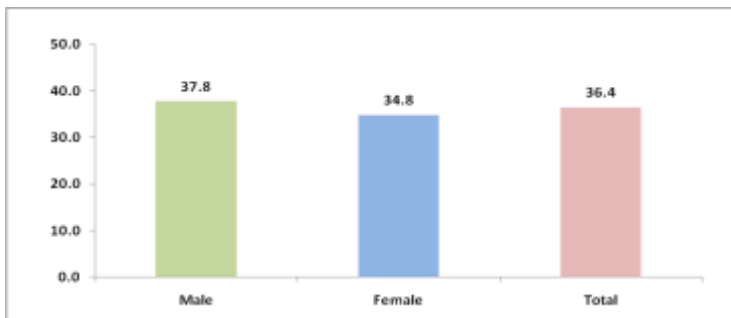

Figure-1: Percentage of Elders in the Surveyed Households

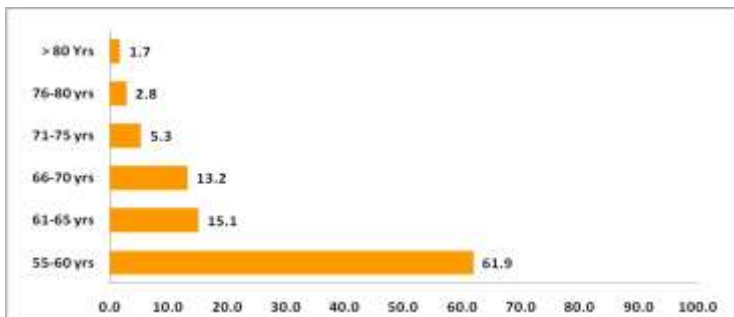

Figure-2: Percentage of Elders in Various Age Groups

While looking at data on percentage of elders in various age groups it becomes clear that as the age increases lesser and lesser elderly persons remain alive. The rate of decrease is lesser as the age group increases.

Educational Status of Elders

Available data on educational status reveal that majority of them are literates (60.8%). Among the rest, illiterates constitute 19.6% followed by 11.7% matriculates. Graduates are almost 4% and 3% of them are Intermediate. All other categories like diploma & PG are insignificant in percentage terms. Details are available in Table 3.1 to Table 3.8.

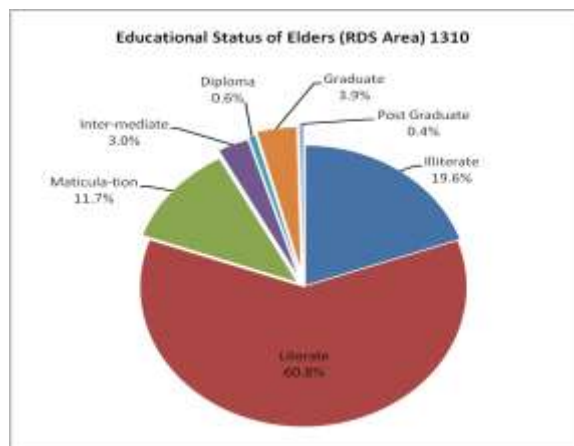

Figure-3: Educational Achievements among Elders

Working & Non-working Elders

69.1% of the elderly persons don't work. Among the working elders working elder men are way higher to working elder women in percentage terms. Among non-working elders percentage of women are much higher than that of non-working men. Working women were not found in the 76-80 and >80 age groups. Details are available in Table 4.1 and Table 4.2.

Disability

Out of the total elders, 1.36% elders have disability of some kind or the other. All disability categories were reported below 0.5%. Further details are available in Table 5.1 to Table 5.7.

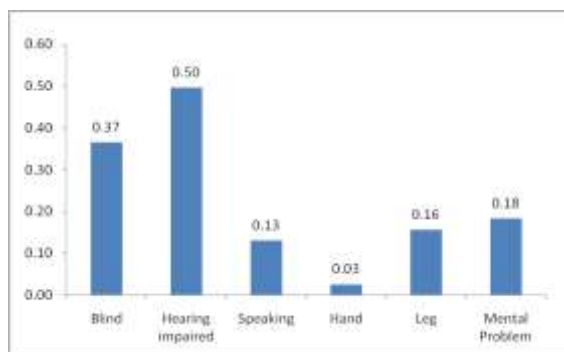

Figure-4: Disability in Elders

Habits among Elders

Less than 7% all elders have not reported consumption of one intoxicant or the other. Out of all elders consuming intoxicants, highest percentage of them is consuming Gutkha (61.7%). Tobacco chewing is 15.6%. Cigarettes smoking is reported 7.8%. Rest all other habits are reported between less than 3% to less than 1.5%.

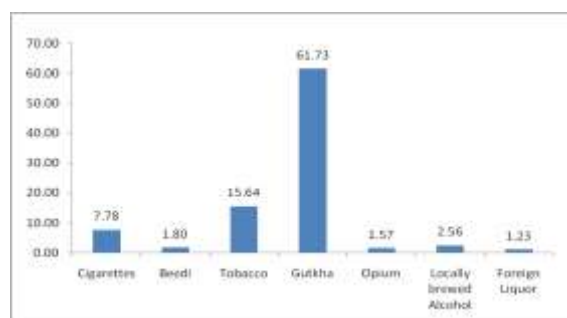

Figure-5: Habits in Elders

Disease Profile of Elders

Among the diseases reported by the surveyed elders, joint pain was reported by highest percentage of men and women (57.6% and 51% respectively) followed by hyper-tension (almost 45.5% men and more than 34.5% women), diabetes (more than 11.5% men and 4.5% women), Ulcer (6.5% men and 5.5% women), heart problem (almost 5.5% men and more than 3.5% women). Asthma, Allergies and tuberculosis percentages were reported at much lesser levels. The picture is clear from the figure given below. Further details are available in Table 7.1 to Table 7.9.

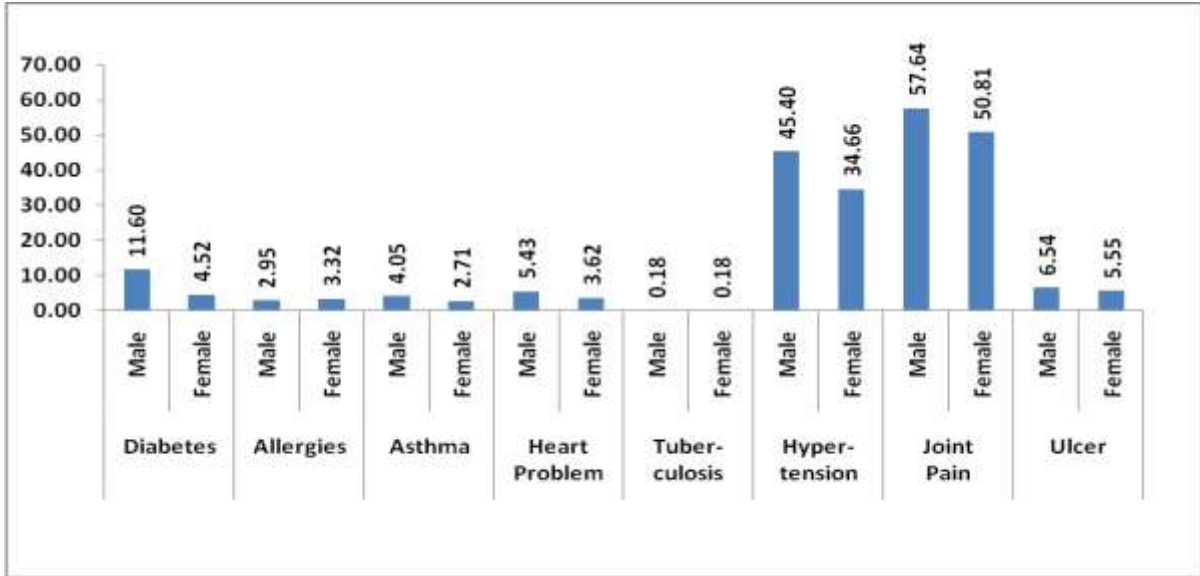

Figure-6: Disease Profile of Elders

Further details on all the aspects related to elders are available in the tables presented below.
