MOBILE HEALTHCARE PROGRAMME FOR THE AGED IN 20 LOCATIONS ACROSS INDIA

Analysis & Findings of Baseline Survey Conducted for implementation of Mobile Health Care Programme for the Aged in Operational Area of Silchar MMU under ONGC Tricon, Silchar Forward Base

Project Implemented by

HelpAge India | Fighting isolation,
poverty, neglect

Study conducted by

Four x4
Empowering People

Analysis & Findings of Baseline Survey Conducted for implementation of Mobile Health Care Programme for the Aged

Unit: Silchar (MMU MIS Location Code: 1307)

Background

ONGC’s Silchar unit is located in Cachar District of Assam. The identified villages MMU operations are located at Banskandi & Govindpur Algapur blocks covering 3 major Gram Panchayats. After villages were identified in consultation with ONGC senior officials, survey was accordingly organized to locate all households with elders.

Demography

Out of the total 1602 surveyed households, almost 60.1% belonged to the Below Poverty Line (BPL) category and 39.9% belonged to the Above Poverty Line (APL) category. Out of the total members found in the surveyed households a total percentage of marginally more than 24.5% were elders. Elder males (25.60%) are more than elder females (23.59%). For details please see Table No. 1.1 and 2.1.

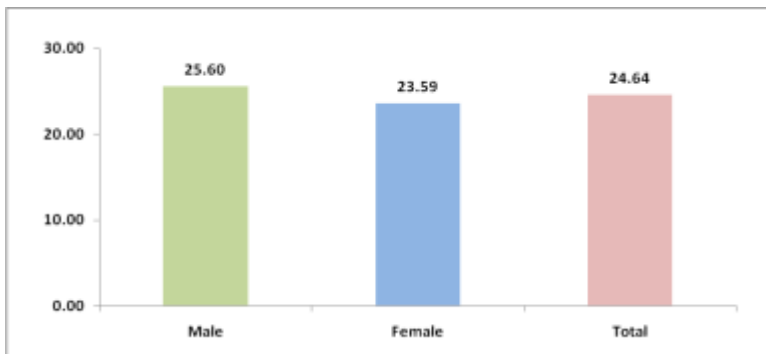

Figure-1: Percentage of Elders in the Surveyed Households

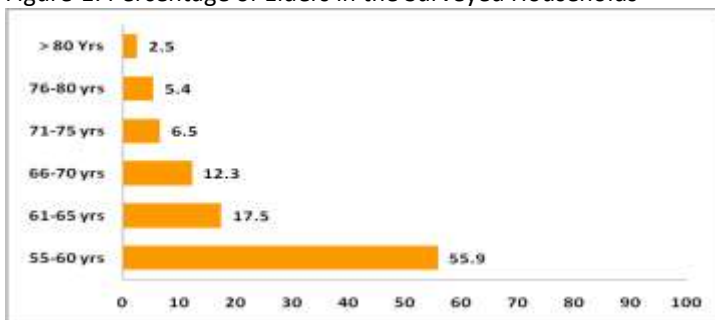

Figure-2: Percentage of Elders in Various Age Groups

While looking at data on percentage of elders in various age groups it becomes clear that as the age increases lesser and lesser elderly persons remain alive. The rate of decrease is lesser as the age group increases.

Educational Status of Elders

Available data on educational status reveal that majority of them are illiterates (63.5%). Among the rest, literates constitute 30.4% followed distantly by more than 4.2% matriculates. All other categories like graduate, Post Graduates etc. are below 1% level. No Diplomas were found. Details are available in Table 3.1 to Table 3.8.

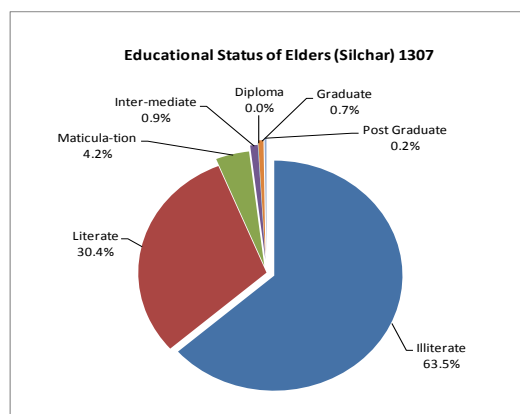

Figure-3: Educational Achievements among Elders

Working & Non-working Elders

Almost 67% of the elderly persons don't work. Among the working elders working elder men are way higher to working elder women in percentage terms. Among non-working elders percentage of women are much higher than that of non-working men. Working women were not found in the 76-80 and >80 year age groups. Further details are available in Table 4.1 and Table 4.2.

Disability

Out of the total elders, 5.80% elders have disability of some kind or the other. Highest figure of disability reported is of blindness 2.95%, while all other disabilities reported below 1%. Further details are available in Table 5.1 to Table 5.7.

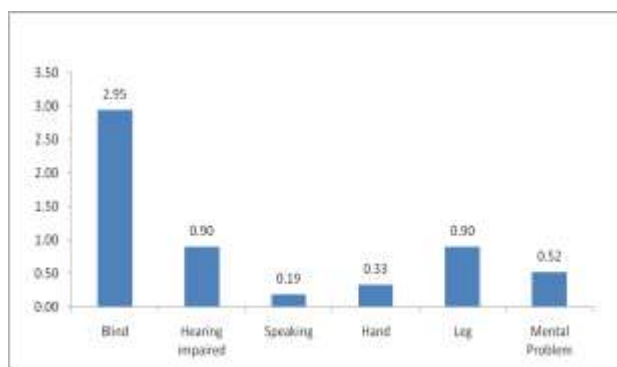

Figure-4: Disability in Elders

Habits among Elders

More than 84.5% of all elders have not reported consumption of one intoxicant or the other. Out of all elders, highest percentage of them is smoking beedi (12.21%) and Tobacco consumption was recorded at 2.28%. Cigarettes smoking is at less than 1%. All other habits were reported nil.

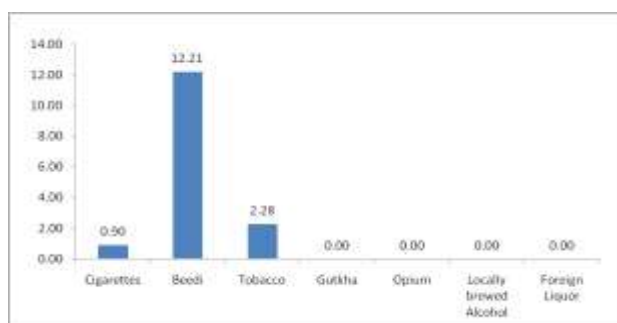

Figure-5: Habits in Elders

Disease Profile of Elders

Among the diseases reported by the surveyed elders, joint pain was reported by highest percentage of men and women (less than 12% and almost 12.5% respectively) followed by Ulcer (almost 11.5% men and 10% women), hyper-tension (more than 8% men and almost 6% women), and heart problem (more than 6% men and more than 4% women). Allergies, Asthma, diabetes and tuberculosis were reported at much lower levels. Female percentage was recorded marginally higher than male percentage only in case of joint pain. The picture is clear from the figure given below. Further details are available in Table 7.1 to Table 7.9.

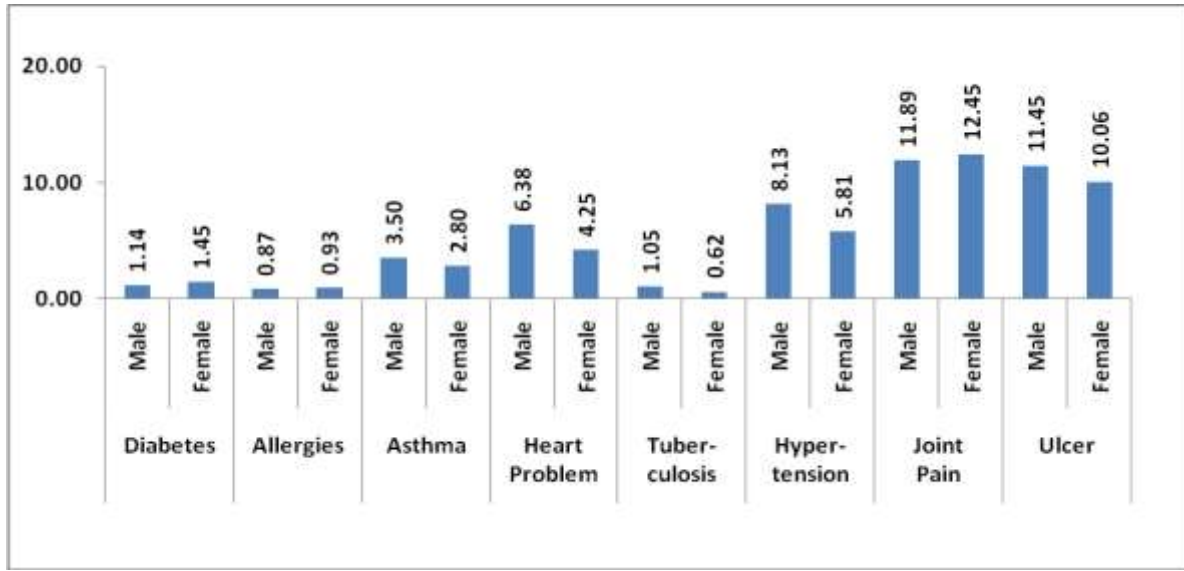

Figure-6: Disease Profile of Elders

Further details on all the aspects related to elders are available in the tables presented below.
